

Rosters and Working Time Survey

Colleagues,

The Garda Representative Association (GRA) is acutely aware that Rosters/Working Time is one of the most important issues affecting the welfare, wellbeing and work/life balance of you and your family.

Given the gravity and importance of Rostering and Working Time arrangements to all of our members, the GRA has commissioned a research survey of our members' experiences and perspective to their current duty rosters.

The research survey will be conducted by Professor Andrew Coogan, NUI Maynooth and he will carry out an analysis and report on the Rostering /Working Time survey findings.

The methodology for carrying out this survey will be via Garda email utilising the Garda Portal with a link to an external site. It is protected against unauthorised access or corruption in terms of data security, and the validity and accuracy of data relating to data integrity is assured. The survey is confidential. It is anticipated that it will take approximately ten (10) minutes for each GRA member to complete.

The survey will commence in the coming weeks and remain open for approximately 21 days.

This survey will give an opportunity to all of our members to contribute their views in order to ensure that the GRA has a clear, cohesive, informed and unified mandate on the subject.

Please take time to consider all the questions carefully before answering.

Pat Ennis
General Secretary.

22nd March 2019.
